

COLD-IN-PLACE RECYCLING

- FDR/CIR Emulsions

WHY CHOOSE TRI-STATE

Our materials can be produced to meet all DOT specifications and meet all AASHTO testing requirements across the U.S.

Tri-State's innovative laboratory technicians develop, test and customize any product we have to offer in order to cater to the rapidly changing needs of our industry. We offer our customers:

- ✓ The highest quality asphalt and emulsion products
- ✓ Custom mix designs
- ✓ Professional and talented laboratory technicians
- ✓ Custom formulations for asphalt & emulsion products
- ✓ Incomparable customer service
- ✓ Our own fleet to deliver right to your plant or job site
- ✓ Competitive pricing

BENEFITS OF CIR

Fast & Easy

This process offers a simple and expedient method to rehabilitating a road that would have taken weeks to rebuild by only taking days.

Reduced Waste

No asphalt or aggregate is wasted during the CIR process as it is all reincorporated back into the mix which reduces transportation cost of removing old material and bringing new material on site.

Extended Life

Can extend the life of the roadway by 10-15 years and costs one-half to one-third the cost of a traditional total reconstruction.
